

Getting to know your Echo

Additional features: built-in smart home hub and temperature sensor.

Alexa is designed to protect your privacy

Wake word and indicators

Alexa doesn't begin listening until your Echo device detects the wake word (for example, "Alexa") or you press the Action button on the device. A blue light indicator lets you know when the device is recording your request to stream to Amazon's secure cloud. If you like, you can also enable an audio tone.

Microphone controls

You can electronically disconnect the microphones with the press of a button.

Voice history

Want to know exactly what Alexa heard? You can view and delete the voice recordings associated with your account in the Alexa app, or by simply saying "delete what I said".

These are just a few of the ways that you have transparency and control over your Alexa experience. Explore more at amazon.in/alexaprivacy.

1. Download the Amazon Alexa app

On your phone or tablet, download and install the latest version of the Alexa app from your app store.

Note: before setting up your device, have your Wi-Fi network name and password ready.

2. Plug in your Echo

Plug your Echo into an electrical socket using the included power adaptor. A blue light ring will spin around the bottom. In about a minute, Alexa will greet you and let you know to complete setup in the Alexa app.

Use the power adaptor included in the original packaging for best performance.

3. Set up your Echo in the Alexa app

Open the Alexa app to set up your Echo. Log in with an existing Amazon account username and password, or create a new account. If you aren't prompted to set up your device after opening the Alexa app, tap the More icon to add your device manually.

The app helps you get more out of your Echo. It's where you set up calling and messaging, manage music, lists, settings and news.

For help and troubleshooting, go to Help & Feedback in the Alexa app or visit www.amazon.com/devicesupport.

Optional: Set up compatible smart home devices

You can easily connect and control compatible Zigbee devices with the built-in smart home hub. When ready to get started, open the Alexa app to add your device, or say, "Alexa, discover devices".

Things to try with your Echo

Enjoy your favourite music

Alexa, play '90s Bollywood music.

Alexa, play nursery rhymes.

Get answers to your questions

Alexa, what can I watch this week?

Alexa, what sound does a lion make?

Get news, weather and sports updates
