1. IDENTIFY THE MOUNT PLACEMENT

Tip: If you need to use the spare adhesive for replacement, use an alcohol pad to clean the mount and the selected surface.

4. PLACE SPEAKER & ROUTE CABLE

If you want to store your Echo Auto, unplug the cable and remove the device from the mount as shown.

SET UP YOUR ECHO AUTO

Start with your vehicle in the parked position and ignition turned on.

1. PLUG IN YOUR ECHO AUTO

Plug the USB cable into your car's power outlet using the included adaptor (A) or directly into the USB port (B).

Your car must be turned on to power the device. You will see a sweeping orange light and Alexa will greet you.

If an orange light does not appear after 1 minute, hold down the Action button for 8 seconds.

Log in with an existing Amazon account username and password or create a new account.

Note: Be sure to turn on your phone's Bluetooth.

3. FOLLOW SETUP IN THE APP

If you aren't prompted to set up your device after opening the Alexa app, tap the More icon to add your device manually.

The app helps you to get more out of your Echo Auto. It's where you set up calling and messaging, manage music, lists, settings and news.
